Color Sensing
Digital Fiber Sensor E3X-DAC-S

## Easy and Reliable

## The Fiber Sensor That Sees in Color

New Model with Four-color Determination for Even More Complete Color-sensing Fiber Sensors

# Color-Sensing <br> Engine 

Color Sensing

## Easy and Reliable ... Featuring a Color-sensing Engine

The color-sensing engine uses three parameters, RGB, to process incident light. It detects color information from the workpiece for precise
detection of color differences.

A high-power white LED and a multi-RGB processing system combine to cover all RGB wavelengths, enabling easy and accurate detection of workpieces without having to use a different light source to match each one.

Changes in the three parameters are processed as a ratio, so they are not affected by light-intensity variations due to workpiece movement.

## Thinnest in the Industry

## A Slim, 10-mm-wide Amplifier Unit

Use of a white LED and a one-package RGB light-receiving element has made it possible to unify the Amplifier Unit, both in size and operation, with conventional models. If detection should become unstable, the Amplifier Unit can be separately replaced to immediately regain stability.

## Easy and Reliable ... Ease of Use and Smart Functions

In addition to ensuring easy use, we have added a number of smart functions, such as remote control to simplify setup, and twin sensing and output to simultaneously distinguish two registered colors. (advanced models)

```
Reliable
Setting guide function.
```

## First in Its Class

This function guides the user to ensure that the workpiece is in an appropriate position for teaching. (Indicates OVER, OK, or LOW.)

## Easy and Reliable ... Simplified Wiring Connector Reduces Work Steps

OMRON's unique simplified wiring connectors provide the power for each added Sensor. Up to 16 Units can be mounted, including a combination of Digital Fiber Sensors and other simplified wiring connector products such as Digital Laser Sensors.

Power is supplied through the connector, so only one output wire is required. (For adding Sensors)

Digital Fiber Sensors: E3X-NA E3X-DA-S/MDA E3X-DAC-S
Digital Laser Sensor: E3C-LDA
Proximity Sensor: E2C-EDA

## Ordering Information

## Amplifier Units

Pre-wired model (Standard cable length 2 m )

| Item | Appearance | Functions | Model |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | NPN output | PNP output |
| Standard models |  | Timer, Response speed change | E3X-DAC11-S 2M | E3X-DAC41-S 2M |
| Advanced models (2-color simultaneous determination) |  | Standard models + Simultaneous determination (2 colors), AND/OR output, Remote setting | E3X-DAC21-S 2M | E3X-DAC51-S 2M |
| Advanced models (4-color determination*) |  | Standard models + Determination (4 colors), AND/OR output, bank switching | E3X-DAC21B-S 2M | E3X-DAC51B-S 2M |

* Four-color determination is enabled by switching between banks for two outputs using an external input.

Amplifier Units with Connectors (Amplifier Unit Connectors must be purchased separately.)

| Item | Functions | Model |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | NPN output | PNP output |  |
| Standard models |  | Timer, Response speed change | E3X-DAC6-S | E3X-DAC8-S |

Amplifier Unit Connectors (Order Separately) Note: Protector seals are provided as accessories.

| Item | Appearance | Cable length | No. of conductors | Model |
| :--- | :---: | :---: | :---: | :---: |
| Master <br> Connector |  |  | 3 | E3X-CN11 |
| Slave <br> Connector |  |  |  |  |
|  |  |  | 1 | E3X-CN12 |

| Combining Amplifier Units and Connectors | Amplifier Unit |  |  | Applicable Connector (Order Separately) |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Amplifier Units and Connectors are sold separately. Refer to the following tables when placing an order. | Model | NPN output | PNP output | Master Connector | Slave Connector |
|  | Standard models | E3X-DAC6-S | E3X-DAC8-S | E3X-CN11 | E3X-CN12 |
|  | When Using 5 Amplifier Units |  |  |  |  |
|  | Amplifier Units (5 Units) |  |  | 1 Master Connector | 4 Slave Connectors |

## Accessories (Order Separately)

Mounting Bracket

| Appearance | Model | Quantity |
| :---: | :---: | :---: |
|  | E39-L143 | 1 |

End Plate

| Appearance | Model | Quantity |
| :---: | :---: | :---: |
|  | PFP-M | 1 |

| Insulation resistance |  | 20 M min . (at 500 VDC ) |  |  |
| Dielectric strength |  | 1,000 VAC at $50 / 60 \mathrm{~Hz}$ for 1 minute |  |  |
| Vibration resistance |  | Destruction: 10 to 50 Hz with a 1.5-mm double amplitude for 2 hrs each in $\mathrm{X}, \mathrm{Y}$ and Z directions |  |  |
| Shock resistance |  | Destruction: $500 \mathrm{~m} / \mathrm{s}^{2}$, for 3 times each in $\mathrm{X}, \mathrm{Y}$ and Z directions |  |  |
| Degree of protection |  | IEC 60529 IP50 (with Protective Cover attached) |  |  |
| Connection method |  | Pre-wired (Standard cable length 2 <br> m) or Amplifier Unit connector <br> (Units connected: 16 max.) | Pre-wired (Standard cable length 2 m ) |  |

Note:1.Sensing Object: Standard Color Card (230 Colors) from Japan Color Enterprise Co., Ltd.)

| Color (11 standard colors) | Munsell color notation |
| :---: | :---: |
| White | N9.5 |
| Red | 4R 4.5/12.0 |
| Yellow/red | 4YR 6.0/11.5 |
| Yellow | $5 Y$ 8.5/11.0 |
| Yellow/green | 3GY 6.5/10.0 |
| Green | 3G 6.5/9.0 |
| Blue/green | 5BG 4.5/10.0 |
| Blue | 3PB 5.0/10.0 |
| Blue/purple | 9PB 5.0/10.0 |
| Purple | 7P 5.0/10.0 |
| Red/purple | 6RP 4.5/12.5 |
| Black | (N2.0) |

2. When teaching with/without a workpiece, the best sensing method will be automatically selected (RGB ratio (C Mode) or light intensity determination (I Mode)). If color differences are not strong enough and RGB ratios would result in unstable detection, then light intensity determination (I Mode) will be selected.
The detection mode can also be set to C , I, or Black Mode.
3. Input Specifications

|  | Contact input (relay or switch) | Non-contact input (transistor) |
| :---: | :---: | :---: |
| NPN | ON: Shorted to 0 V (sourcing current: 1 mA max.). <br> OFF: Open or shorted to Vcc. | ON: 1.5 V max. (sourcing current: 1 mA max.) <br> OFF: Vcc-1.5V to Vcc (leakage current: 0.1 mA max.) |
| PNP | ON: Shorted to Vcc (sinking current: 3 mA max.). <br> OFF: Open or shorted to 0 V . | ON: Vcc-1.5 V to Vcc (sinking current: 3 mA max.) <br> OFF: 1.5 V max. (leakage current: 0.1 mA max.) |

Refer to the Instruction Manual for the external input pulse width.
A pulse width of 300 ms or longer is required to switch banks for the E3X-DAC $\square B-S$.
4. Mutual interference prevention cannot be used in super-high-speed mode, and light intensity determination (I Mode) must be used.
5. With light intensity determination (I Mode), the correlation is not displayed, but rather the light intensity is displayed.
6. The allowable ambient operating temperature changes according to the number of Units that are linked.
2 Units: 25 to $55^{\circ} \mathrm{C}, 3$ to 10 Units: 25 to $50^{\circ} \mathrm{C}$, and 11 to 16 Units: 25 to $45^{\circ} \mathrm{C}$

## Amplifier Unit Connectors

| Item $\quad$ Model | E3X-CN11 | E3X-CN12 |
| :--- | :--- | :--- |
| Rated current | 2.5 A | 50 V |
| Rated voltage | 20 m max. (20 mVDC max., 100 mA max.) <br> (The figure is for connection to the Amplifier Unit and the adjacent <br> Connector. It does not include the conductor resistance of the cable.) |  |
| Contact resistance | Destruction: 50 times <br> (The figure for the number of insertions is for connection to the Am- <br> plifier Unit and the adjacent Connector.) |  |
| No. of insertions | Haterials | Housing |
|  | Contacts | Polybutylene terephthalate (PBT) |
| Whosphor bronze/gold-plated nickel |  |  |

## E3X-DAC-S

Nomenclature

## Amplifier Units <br> Standard Models <br> E3X-DAC $\square$-S ( $\square:$ 11/41/6/8)

## Safety Precautions

| \$ WARNING |
| :--- |
| This product is not designed or rated for ensur- |
| ing safety of persons either directly or indirect- |
| ly. |

Do not use it for such purposes.

## $\triangle$ CAUTION

Do not use the product with voltage in excess of the rated voltage. Excess voltage may result in malfunction or fire.

Never use the product with an AC power supply. Otherwise, explosion may result.

High-temperature environments may result in burn injury.

Advanced Models (2-color simultaneous determination, 4-color determination)
E3X-DAC $\square-S(\square: 21 / 51)$, E3X-DAC $\square$ B-S ( $\square:$ 21/51)

Precautions for Safe Use
The following precautions must be observed to ensure safe operation of the Sensor.

1. Do not use the Sensor in an environment where explosive or flammable gas is present.
2. Do not use the Sensor in a location subject to splattering of water, oils, or chemicals.
3. Do not attempt to disassemble, repair, or modify the Sensor.
4. Do not apply voltages or currents that exceed the rated range to the Sensor.
5. Do not use the Sensor in an ambient atmosphere or environment that exceeds the ratings.
6. Wire the power supply correctly, including the polarity.
7. Connect the load correctly.
8. Do not short-circuit the load at both ends.
9. Do not use the Sensor if the case is damaged.
10. Dispose of the Sensor as industrial waste.
11. Do not use the Sensor in locations subject to direct sunlight.
12. Burn injury may occur. The Sensor surface temperature rises depending on application conditions, such as the ambient temperature and the power supply voltage. Use caution when operating or performing maintenance on the Sensor.

## Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

## Amplifier Unit - Designing

## Operation after Turning Power ON

The Sensor is ready to detect within 200 ms after the power supply is turned ON. If the Sensor and load are connected to separate power supplies, be sure to turn ON the Sensor first. Time may be required for the degree of coincidence to stabilize after the power supply is turned ON.

## Operation When Turning Power OFF

Output pulses may occur when the power is turned OFF. Turn OFF the power supply to the load and the load line before turning OFF the power supply to the Sensor.

## - Mounting

Connecting and Disconnecting Connectors

## Mounting Connectors

1. Insert the Master or Slave Connector into the Amplifier Unit until it clicks into place.

2. Attach the protector seals (provided as accessories) to the sides of master and slave connectors that are not connected.

Note: Attach the seals to the sides with grooves.

## Removing Connectors

1. Slide the slave Amplifier Unit(s) for which the Connector is to be removed away from the rest of the group.
2. After the Amplifier Unit(s) has been separated, press down on the lever on the Connector and remove it. (Do not attempt to remove Connectors without separating them from other Amplifier Units first.)

## Adding and Removing Amplifier Units

## Adding Amplifier Units

1. Mount the Amplifier Units one at a time onto the DIN track.

2. Slide the Amplifier Units together, line up the clips, and press the Amplifier Units together until they click into place.

## Removing Amplifier Units

Slide Amplifier Units away from each other, and remove from the DIN track one at a time. (Do not attempt to remove Amplifier Units from the DIN track without separating them first.)

Note:1. The specifications for ambient temperature will vary according to the number of Amplifier Units used together. For details, refer to Ratings and Specifications.
2. Always turn OFF the power supply before joining or separating Amplifier Units.

## Mounting the End Plate (PFP-M)

An End Plate should be used if there is a possibility of the Amplifier Unit moving, e.g., due to vibration.

Fiber Connection
The E3X Amplifier Unit has a lock button for easy connection of the Fiber Unit. Connect or disconnect the fibers using the following procedures:

## 1. Connection

Open the protective cover, insert the fibers according to the fiber insertion marks on the side of the Amplifier Unit, and lower the lock lever.

Note: Do not pull on, compress, or otherwise exert excessive force on the fibers after connecting them to the Amplifier Unit. (Do not exert more than $0.3 \mathrm{~N} \cdot \mathrm{~m}$.)

## E3X-DAC-S

## 2. Disconnecting Fibers

Remove the protective cover and raise the lock lever to pull out the fibers.

Note:1. To maintain the fiber properties, confirm that the lock is released before removing the fibers.
2. Be sure to lock or unlock the lock button within an ambient temperature range between $10^{\circ} \mathrm{C}$ and $40^{\circ} \mathrm{C}$.

## - Adjusting

## Mutual Interference Protection Function

Light from other sensors can cause the value on the digital display to become somewhat unstable. If this occurs, reduce the threshold to create a greater margin and enable more stable detection.

## Output Short-circuit Protection

If the output short-circuit protection function operates because the load connected to the control output is short-circuited, OVER/CUR will flash on the display. Check the connection of the load.

## EEPROM Writing Error

If the data is not written to the EEPROM correctly due to a power failure or static-electric noise, initialize the settings with the keys on the Amplifier Unit. ERR/EEP will flash on the display when a writing error has occurred.

## Optical Communications

Several Amplifier Units can be slid together and used in groups. Do not, however, slide the Amplifier Units or attempt to remove any of the Amplifier Units during operation.

## - Others

## Protective Cover

Always keep the protective cover in place when using the Amplifier Unit.

## Fiber Unit <br> - Design Precautions

## Applicable Fiber Units

Refer to the sensing distance tables on pages 8 to 11 for the Fiber Units that can be used and the sensing distances. Ret-ro-reflective, Limited-reflective, Ultra-compact, and Applica-tion-specific Fiber Units, which are not listed, cannot be used.

## - Installation Precautions

Glossy Sensing Objects
If the sensing object is glossy, detection may not be stable. If the Sensor is inclined by $5^{\circ}$ to $20^{\circ}$ when using a glossy sensing object, as shown below, detection capabilities can be increased and stable detection achieved.

## E3X-DAC-S

## 1 Changing Banks (for Advanced Models (4-color Determination))

The bank where data is registered can be changed by using the bank input and the channel switch.

| Bank | A | B | C | D |
| :---: | :---: | :---: | :---: | :---: |
| Bank input | Open | Open | Closed | Closed |
| Channel switch | 1 - 2 | $1 \square 2$ | 1 - 2 | $1 \square 2$ |
| Display |  |  |  |  |

## 2 Setting the Operation Mode

The operation mode is set with the Mode Selector.

| Operation mode |  | Operation |
| :--- | :---: | :---: |
| Match ON | L-ON | L |
| (Factory-set) |  |  |
| Mismatch ON | D-ON | $\square$ D |

## I * Advanced Models

The operation mode is set in SET mode.
$\rightarrow$ Page 21 Refer to 5. Setting Functions in SET Mode

I * Advanced Models
Set the Channel Selector to the desired channel before making any adjustments or settings. This is true for all adjustments and settings.

## 3 Registering Workpiece Colors with Teaching in SET Mode <br> I $*$ Workpiece colors must always be taught to perform judgment for registered workpiece colors <br> I * With the factory settings, 1-point teaching can be executed in RUN mode. (Press the MODE Key for 3 s .)

## 3-1. One-point Teaching

Along with registering the workpiece colors, the threshold can be set at approximately $-10 \%$ of the match.
The setting is completed in a simple operation with one press of a button.

## 3-2. Teaching with and without the Workpiece

Two points, with and without the workpiece, are detected, and the match of the intermediate point is set as the threshold value.
This method is ideal for setting thresholds with margins or performing judgments with low match.

*When teaching is performed, position the workpiece by using the OVER, OK, and LO messages displayed on the sub-display (green) as guides.

## 4 Setting Thresholds Manually in RUN Mode

A threshold can be set manually. A threshold value can also be fine-tuned using manual setting after teaching.

[^2]changed, the threshold will appear on the sub-display when the key
I is pressed.

## 5 Setting Functions in SET Mode

## Function Transitions <br> $\rightarrow$ Page 20 <br> Refer to 2. Registering Workpiece Colors with Teaching in SET Mode.

*. The displays shown in the function transitions are for the default settings. *. Items shown in the function transitions may increase depending on detailed settings.
*. The items enclosed by dotted red lines are for advanced models only. (Advanced models with four-color determination do not have External input or External input memory.)

| Functions |  |  |
| :---: | :---: | :---: |
| Use the UP and DOWN Keys to change the settings. |  |  |
| Function | Settings (display) | Description |
| Operation mode | Match: ON Lan, Mismatch: don | $\rightarrow$ Page 20 Refer to 2. Setting the Operation Mode. |
| Detection | Super-high-speed: 545, High-speed: 155 , <br> Standard: 5tad, High-resolution: HrE5 <br> Note: If the detection function is changed, be sure to teach the workpiece color. | Used to increase the response speed or detection precision. <br> Note: Only I Mode (light intensity determination for red, green, or blue) can be used with Super-high-speed mode. |
| Timer | Enabled: --- , OFF-delay timer: ofFd ON-delay timer: on-d, One-shot timer: :Sht | Used to set control output timers. |
| Timer time (timer enabled) | 1 to 5000 ms : to 5980 <br> ( 1 to $20: 1$ - ms increments, 20 to $200 \mathrm{~ms}: 5-\mathrm{ms}$ increments, <br> 200 to 1000: 100-ms increments, 1000 to 5000 : 1000 -ms increments) | Used to change timer times. The timer can be set from 1 ms to 5 s . |
| MODE key | 1-point teaching: Pnt, Teaching with workpiece: ZPnt Zero-shift reset: it 5 t <br> $\rightarrow$ Page 22 Refer to $\frac{6}{6}$ - Zeroing the Display (Zero Reset). | Used to change the function of the MODE key during operation. |
| Teaching level | 0 to 99P: 8 to 99 | Used to change the threshold setting level during 1-point teaching. Example: The threshold level at the default setting (iid) is 900 When the setting is 20 , the threshold level is 80.9 . |
| Display switch | (1) Match/threshold: $\square$ <br> (2) Margin/threshold: $\square$ <br> (3) Peak/Bottom refreshed every 2 s : $\qquad$ <br> (4) Peak/Bottom refreshed every time the output is switched: L $-P G[d-b E$ <br> (5) Analog bar display: $\square$ <br> (6) Match/peak (updated periodically): <br> 85G PERH <br> (7) Match/channel: | 1. Used to display the degree of matching and the threshold. <br> 2. Used to display the excess gain (i.e., percentage of matching relative to threshold) and the threshold. <br> 3. Used to display the peak and bottom degrees of matching at a fixed interval. <br> 4. Used to display the peak degree of matching when there is a match and the bottom degree of matching when there is no match. <br> 5. Used to show the detection status with a bar display. Red bars will be displayed if the degree of match exceeds the threshold. <br> 6. Used to display the present degree of matching and the peak degree of matching. <br> 7. Used to display the degree of matching and channel number. |
| Display orientation | Normal display: d 123, Upside down display: E21P | Used to change the orientation of the display. |
| Output setting | Each channel: 2041 , AND: Rad, OR: or | Used to change the item output on control output 2. |
| Timer function | Enabled: ․-., OFF-delay timer: ofFd ON-delay timer: on-d, One-shot timer: :Sht | Used to set timers for the AND/OR control output. |
| Timer time | 1 to 5000 ms : to 5000 a <br> (1 to 20: 1-ms increments, 20 to $200 \mathrm{~ms}: 5$-ms increments, 200 to 1000 : 100 -ms increments, 1000 to 5000 : 1000 -ms increments) | Used to change timer time. The timer can be set from 1 ms to 5 s . |
| External input | 1-point teaching: $1 P n t$, Teaching without workpiece: EP nt Zero-shift reset: © Ar 5 t , Light OFF: LaFF | Used to change the functions to be remotely controlled with external input. (For the effective pulse width and other information, refer to the instructions provided with the product.) |
| External input memory | Write: on, Do not write: of F | Used to set whether to write the control results to memory. (Refer to the instructions provided with the product.) |
| Judgment mode | C/I automatic judgment: Puta, C mode: 5 , I mode: BLACK mode: $b \mathrm{~L}, \mathrm{H}$ | Used to set the judgment mode (detection method). BLACK mode: The total light intensity for red, green, and blue is used for the judgment. |

## E3X-DAC-S

6 Convenient Functions

## 6-1. Zeroing the Display (Zero Reset)

The incident light level on the main display can be set to
0 . This is useful when the reference display is to be reset to zero because the match display and the threshold are shifted at the same time.

* Change the function to ORST (zero reset) with the MODE key

The default setting is 1PNT.
। $\rightarrow$ Page 21 Refer to 5. Setting Functions in SET Mode.

-     -         -             -                 -                     -                         -                             -                                 -                                     -                                         -                                             -                                                 -                                                     -                                                         -                                                             -                                                                 -                                                                     -                                                                         - 

To return to original value for incident light level:

## 6-2. Locking the Keys (Key Lock)

All key operations can be disabled.
 disabled.

To release the lock:

I* If a key is pressed while key operations are locked, "LOC" will flash
twice on the display to indicate that
key operations have been disabled.

* Press the UP key right after pressing the MODE key

## 6-3. Saving a Set State (Saving User Settings)

* Be sure to register (i.e., teach) the workpiece colors if the detection functions have been changed.

## Terms and Conditions of Sale

1. Offer; Acceptance. These terms and conditions (these "Terms") are deemed part of all quotes, agreements, purchase orders, acknowledgments, price lists catalogs, manuals, brochures and other documents, whether electronic or in writing, relating to the sale of products or services (collectively, the "Products") by Omron Electronics LLC and its subsidiary companies ("Omron"). Omron objects to any terms or conditions proposed in Buyer's purchase order or other documents which are inconsistent with, or in addition to, these Terms.
2. Prices; Payment Terms. All prices stated are current, subject to change without notice by Omron. Omron reserves the right to increase or decrease prices on any unshipped portions of outstanding orders. Payments for Products are due net 30 days unless otherwise stated in the invoice.
3. Discounts. Cash discounts, if any, will apply only on the net amount of invoices sent to Buyer after deducting transportation charges, taxes and duties, and wil be allowed only if (i) the invoice is paid according to Omron's payment terms and (ii) Buyer has no past due amounts.
4. Interest. Omron, at its option, may charge Buyer $1-1 / 2 \%$ interest per month or the maximum legal rate, whichever is less, on any balance not paid within the stated terms
5. Orders. Omron will accept no order less than $\$ 200$ net billing.
6. Governmental Approvals. Buyer shall be responsible for, and shall bear all costs involved in, obtaining any government approvals required for the importation or sale of the Products.
7. Taxes. All taxes, duties and other governmental charges (other than general real property and income taxes), including any interest or penalties thereon, imposed directly or indirectly on Omron or required to be collected directly or indirectly by Omron for the manufacture, production, sale, delivery, importation, consumption or use of the Products sold hereunder (including customs duties and sales, excise, use, turnover and license taxes) shall be charged to and remitted by Buyer to Omron.
8. Financial. If the financial position of Buyer at any time becomes unsatisfactory to Omron, Omron reserves the right to stop shipments or require satisfactory security or payment in advance. If Buyer fails to make payment or otherwise comply with these Terms or any related agreement, Omron may (without liabilucts sold hereunder and stop any Products in transit until Buyer pays all ucts sold hereunder and stop any Products in transit until Buyer pays all
amounts, including amounts payable hereunder, whether or not then due, amounts, including amounts payable hereunder, whether or not then due,
which are owing to it by Buyer. Buyer shall in any event remain liable for all which are owing
unpaid accounts.
9. Cancellation; Etc. Orders are not subject to rescheduling or cancellation unless Buyer indemnifies Omron against all related costs or expenses.
10. Force Majeure. Omron shall not be liable for any delay or failure in delivery resulting from causes beyond its control, including earthquakes, fires, floods, strikes or other labor disputes, shortage of labor or materials, accidents to machinery, acts of sabotage, riots, delay in or lack of transportation or the requirements of any government authority.
11. Shipping; Delivery. Unless otherwise expressly agreed in writing by Omron: a. Shipments shall be by a carrier selected by Omron; Omron will not drop ship except in "break down" situations.
b. Such carrier shall act as the agent of Buyer and delivery to such carrier shall constitute delivery to Buyer;
c. All sales and shipments of Products shall be FOB shipping point (unless otherwise stated in writing by Omron), at which point title and risk of loss shall pass from Omron to Buyer; provided that Omron shall retain a security interest in the Products until the full purchase price is paid;
d. Delivery and shipping dates are estimates only; and
. Omron will package Products as it deems proper for protection against normal handling and extra charges apply to special conditions.
12. Claims. Any claim by Buyer against Omron for shortage or damage to the Products occurring before delivery to the carrier must be presented in writing to Omron within 30 days of receipt of shipment and include the original transportation bill signed by the carrier noting that the carrier received the Products from Omron in the condition claimed.
13. Warranties. (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied. (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABIL-

ITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty. See http://www.omron247.com or contact your Omron representative for published information.
14. Limitation on Liability: Etc. OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY. Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.
15. Indemnities. Buyer shall indemnify and hold harmless Omron Companies and their employees from and against all liabilities, losses, claims, costs and expenses (including attorney's fees and expenses) related to any claim, investigation, litigation or proceeding (whether or not Omron is a party) which arises or is alleged to arise from Buyer's acts or omissions under these Terms or in any way with respect to the Products. Without limiting the foregoing, Buyer (at its own expense) shall indemnify and hold harmless Omron and defend or settle any action brought against such Companies to the extent based on a claim that any Product made to Buyer specifications infringed intellectual property rights of another party.
16. Property; Confidentiality. Any intellectual property in the Products is the exclusive property of Omron Companies and Buyer shall not attempt to duplicate it in any way without the written permission of Omron. Notwithstanding any charges to Buyer for engineering or tooling, all engineering and tooling shall remain the exclusive property of Omron. All information and materials supplied by Omron to Buyer relating to the Products are confidential and proprietary, and Buyer shall limit distribution thereof to its trusted employees and strictly prevent disclosure to any third party.
17. Export Controls. Buyer shall comply with all applicable laws, regulations and licenses regarding (i) export of products or information; (iii) sale of products to "forbidden" or other proscribed persons; and (ii) disclosure to non-citizens of regulated technology or information.
18. Miscellaneous. (a) Waiver. No failure or delay by Omron in exercising any right and no course of dealing between Buyer and Omron shall operate as a waiver of rights by Omron. (b) Assignment. Buyer may not assign its rights hereunder without Omron's written consent. (c) Law. These Terms are governed by the law of the jurisdiction of the home office of the Omron company from which Buyer is purchasing the Products (without regard to conflict of law principles). (d) Amendment. These Terms constitute the entire agreement between Buyer and Omron relating to the Products, and no provision may be changed or waived unless in writing signed by the parties. (e) Severability. If any provision hereof is rendered ineffective or invalid, such provision shall not invalidate any other provision. (f) Setoff. Buyer shall have no right to set off any amounts against the amount owing in respect of this invoice. (g) Definitions. As used herein, "including" means "including without limitation"; and "Omron Companies" (or similar words) mean Omron Corporation and any direct or indirect subsidiary or affiliate thereof.

## Certain Precautions on Specifications and Use

1. Suitability of Use. Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the with any standards, codes or regulations which apply to the combination of the
Product in the Buyer's application or use of the Product. At Buyer's request, Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases but the following is a non-exhaustive list of applications for which particular attention must be given: (i) Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.
(ii) Use in consumer products or any use in significant quantities.
(iii) Energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations. (iv) Systems, machines and equipment that could present a risk to life or property. Please know and observe all prohibitions of use applicable to this Product.
NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO

ADDRESS THE RISKS, AND THAT THE OMRON'S PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.
2. Programmable Products. Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.
3. Performance Data. Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.
4. Change in Specifications. Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.
5. Errors and Omissions. Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
